**BRIXHAM
THEATRE**

invites you to write a **Love Poem**

St. Valentine's Day is coming. A day for lovers and thoughts of love. With time on your hands, perhaps you will feel inspired to pen a love poem. Why not enter our free competition?

Love, of course, comes in many shapes and sizes. There is love at first sight; teenage crushes; love in later years; love that transcends the grave. Sadly, there is unrequited love and impossible love because of age difference, cultural barriers, or physical distance. There is love between dear friends and a parent's love for their child. Maybe you fancy writing an ode to your beloved pet. Is there a character from history you wish you had been able to love? Could it be possible you nurse a secret passion for Terry's dark chocolate oranges?

What about the love for a theatre that is sorely missed.
